

MOHAMED ASHISH ROSHAN

Python Full Stack Developer | Software Engineer

📍 Tiruchirappalli, Tamil Nadu | ✉️ mohamedashishroshanpc@gmail.com | 📞 +91-8148199506
🐙 github.com/AshishRoshan26 | 🔗 linkedin.com/in/AshishRoshan

EXECUTIVE SUMMARY

Results-driven Software Engineer with proven expertise in Python, Django, and FastAPI, delivering scalable REST APIs and robust database-driven applications across both relational and non-relational databases. Brings end-to-end backend ownership — from test-driven development with pytest and unittest to containerized, cloud-ready deployments using Docker and AWS. Consistently delivers clean, maintainable, production-grade software aligned with industry-standard Git workflows and engineering best practices. Actively advancing into DevOps with a focus on CI/CD pipelines and cloud infrastructure — combining strong technical depth with a growth mindset that scales with the role.

EDUCATION

B.E. Computer Science and Engineering – M.I.E.T Engineering College, Tiruchirappalli (CGPA:8.5/10)	2026
HSC – Alpha Wisdom Vidyashram Senior Secondary School (70%)	2022
SSLC – Alpha Wisdom Vidyashram Senior Secondary School (76%)	2020

TECHNICAL SKILLS

- Languages & Backend:** Python, Django, FastAPI, REST API Development, SQL
- Frontend (Basic):** JavaScript, React.js, Bootstrap
- Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Database Design, Query Optimization (Basic)
- Testing & Quality:** pytest, unittest, Unit Testing, Integration Testing, Test Coverage
- Systems & Networking:** Linux, Bash Scripting, TCP/IP, OSI Model, System Troubleshooting
- Version Control:** Git, Feature-Branch Workflow, Pull Requests
- DevOps (In Progress):** Docker, GitHub Actions, CI/CD Pipelines, AWS (EC2, S3, RDS)
- AI Prompting & Tools:** Claude Code, OpenAI Codex (GPT), Prompt Engineering, AI-assisted Development

KEY PROJECTS

SentinelX AURAPRIME – DevSecOps Intelligence Platform	GitHub
<i>FastAPI, React, Docker, GitHub Actions, PostgreSQL, pytest</i>	
- Developed a DevSecOps platform integrating vulnerability scanning, dependency analysis, and security reporting into a centralized dashboard - Built REST APIs using FastAPI for security data ingestion, report generation, and risk analysis workflows - Implemented CI/CD automation using GitHub Actions and Docker for containerized deployment and validation - Designed interactive dashboards to monitor application security posture and visualize detected vulnerabilities	
TrafficGuard – Web Application Firewall	GitHub
<i>Django REST Framework, Python</i>	
- Developed a Web Application Firewall capable of detecting and filtering malicious HTTP requests - Implemented protection mechanisms against common OWASP Top 10 attacks including SQL Injection and XSS - Added request monitoring, rate limiting, and traffic analysis features to identify suspicious activities - Built a dashboard for viewing security alerts, blocked requests, and traffic statistics	
SysMonitor Pro – Distributed System Monitoring Platform	GitHub
<i>Django, FastAPI, Docker, AWS EC2, unittest</i>	
- Built a distributed monitoring platform to track CPU, memory, disk usage, and service availability across multiple systems - Developed backend APIs using Django REST Framework and FastAPI for real-time metric collection and monitoring	

- Containerized services with Docker and deployed the application on AWS EC2
- Implemented alerting and logging mechanisms for improved system observability and troubleshooting

Shipping Document Validator

[GitHub](#)

Django, Celery, Redis, Tesseract OCR, PyMuPDF, React

- Developed an OCR-based document validation system for extracting and verifying shipping data from PDFs
- Integrated Tesseract OCR and PyMuPDF for automated document parsing and text extraction
- Used Celery and Redis for asynchronous task execution and background document processing
- Improved document handling workflows by reducing manual verification effort

Railway Stock Management System

[GitHub](#)

Django, PostgreSQL

- Developed a railway inventory management system for stock tracking and warehouse management
- Designed PostgreSQL database schemas for inventory records and stock movement tracking
- Implemented authentication and role-based access control for secure system usage
- Built reporting modules for stock availability and transaction monitoring

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern – Vdart Academy

1 Month

- Engineered the **Shipping Document Validator System** using **Django** and **Tesseract OCR**, automating document verification workflows
- Designed and implemented RESTful API integrations for document intake, processing, and validation pipelines using **Django REST Framework**
- Managed relational database schemas in **PostgreSQL** and **MySQL** for structured document storage and audit logging
- Diagnosed and resolved application defects through systematic log analysis and improved exception handling

Python Developer Intern (Remote) – Outrix

1 Month

- Developed Python-based applications including a real-time **Weather App**, **Scientific Calculator**, and **Map API integration tool**
- Integrated third-party REST APIs and implemented data processing workflows for real-time applications
- Wrote modular, reusable, and well-documented Python code following software development best practices
- Gained practical exposure to the software development lifecycle including implementation, testing, and deployment

CERTIFICATIONS

Django Web Development – Guvi (IIT Madras)

Python Selenium Automation – Guvi (IIT Madras)

Web Scraping – Great Learning

CCNT (Cisco Certified Network Technician) – Cisco

Docker For Beginners – KodeKloud

Database for Developers: Next Level – Oracle

Diploma in SQL Server – Alison

AWS Cloud Quest: Cloud Practitioner – AWS

TECHNICAL EVENTS & COMPETITIONS

- Participated in **National Technical Exhibition** at Dr. Ambedkar Institute, Bangalore
- Participated in **CodeHunters – Algorithm Optimization Challenge**
- Participated in **HackSprint25 – 24-Hour Hackathon**

Competitive Achievements:

- Advanced to **Round 3 of TCS CodeVita**
- Practices DSA consistently on **LeetCode** focusing on Arrays, Strings, Trees, HashMaps, and Dynamic Programming
